## **Design & Technology**

# **Metals**

## Materials required for questions

- Pencil
- Rubber
- Calculator

#### **Instructions**

- Use black ink or ball-point pen
- Try answer all questions
- Use the space provided to answer questions
- Calculators can be used if necessary
- Use a cross in the box to mark you answer

#### Advice

- Marks for each question are in brackets
- Read each question fully
- Try to answer every question
- Don't spend too much time on one question

# Good luck!

| Q1. What makes a metal a ferrous metal?                                      |                         |  |  |  |  |
|--|-------------------------|--|--|--|--|
| Α  | It must contain carbon  |  |  |  |  |
| В  | It must contain iron    |  |  |  |  |
| С  | It must contain rust    |  |  |  |  |
| <b>Q2.</b> The carbon content in ferrous metals usually ranges between what? |                         |  |  |  |  |
| Α  | 0.15 and 1.4%           |  |  |  |  |
| В  | 98.3 and 100%           |  |  |  |  |
| С  | 23.3 and 42%            |  |  |  |  |
| Q3. What is a disadvantage of Cast iron?                                     |                         |  |  |  |  |
| Α  | It is ductile           |  |  |  |  |
| В  | It is soft              |  |  |  |  |
| С  | It is brittle           |  |  |  |  |
| Q4. Aluminium is ideal for aircraft due to what property?                    |                         |  |  |  |  |
| Α  | Its malleable           |  |  |  |  |
| В  | Its lightweight         |  |  |  |  |
| С  | Its corrosion resistant |  |  |  |  |

| Q5. What is a disadvantage of Cast iron?                       |                             |  |  |  |  |
|--|-----------------------------|--|--|--|--|
| Α  | It is ductile               |  |  |  |  |
| В  | It is soft                  |  |  |  |  |
| С  | It is brittle               |  |  |  |  |
| <b>Q6.</b> Copper is used for wiring because of what property? |                             |  |  |  |  |
| Α  | It is ductile               |  |  |  |  |
| В  | It is soft                  |  |  |  |  |
| С  | It is brittle               |  |  |  |  |
| Q7. Why is brass used in gears?                                |                             |  |  |  |  |
| Α  | Casts well                  |  |  |  |  |
| В  | Easy to machine             |  |  |  |  |
| С  | Low coefficient of friction |  |  |  |  |
| Q8. What might stainless steel be used to make?                |                             |  |  |  |  |
| Α  | Kitchen utensils            |  |  |  |  |
| В  | Ship propellers             |  |  |  |  |
| С  | Magnets                     |  |  |  |  |

| <b>Q9</b> . A kitchen sink that has been manufactured from stainless steel.  |
|--|
| Provide <b>two physical</b> and <b>two mechanical</b> characteristics of the metal chosen for the kitchen sink, along with an explanation for why each property is appropriate for this product. (8 marks) |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
|  |
| Q10. Die-casting is a common process used for making metal products.   |
| Explain <b>one</b> specific characteristic of zinc that justifies its usage as a material for die-casting. <b>(2 marks)</b>  |
|  |
|  |
|  |

| <b>Q11</b> . Casting is a common process used for making metal products such as brass paperweights.                            |  |  |  |  |  |  |
|--|--|--|--|--|--|--|
| Explain <b>one</b> specific characteristic of zinc that justifies its usage as a material for casting. <b>(2 marks)</b>        |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
| Q12. Explain three distinct mechanical properties of copper that render it appropriate for usage as electrical wire. (6 marks) |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

### <u>Answers</u>

- **Q1.** B
- **Q2.** A
- **Q3.** C
- **Q4.** B
- **Q5.** C
- **Q6.** A
- **Q7.** C
- **Q8.** A

#### Q9.

#### **Mechanical Properties**

- Due to its hardness (1) since its surface resists scratches from cutlery, dishes, washing, etc (1).
- Toughness (1) prevents it from breaking if a pan is dropped on it (1).
- Malleability (1) means it is press-formable into the sink's shape (1).

#### Physical properties

- Corrosion resistance (1) won't rust or deteriorate when in contact with water (1).
- Chemical resistance (1) prevents detergent degradation (1).

#### Q10.

- When molten, zinc has good fluidity (1), so it will flow easily into the die (1).
- Zinc uses less energy to melt (1) because of its low melting point (1).

#### Q11.

- When molten, brass has good fluidity (1), so it will flow easily into the die (1).
- Brass uses less energy to melt (1) because of its low melting point (1).

#### Q12.

- Enough durability (1) to withstand breaking (1).
- Flexibility (1) allows the wire to flex without snapping (1).
- Ductility (1) to enable wire drawing (1).
- Fatigue strength (1), which enables repeated bends without fracture (1).
- Being soft (1) makes it simple to cut (1).

• Creep resistant (1), preventing deformation from repeated pressures (1).
