Design & Technology

Woods

Materials required for questions

- Pencil
- Rubber
- Calculator

Instructions

- Use black ink or ball-point pen
- Try answer all questions
- Use the space provided to answer questions
- Calculators can be used if necessary
- For the multiple choice questions, circle your answer

Advice

- Marks for each question are in brackets
- Read each question fully
- Try to answer every question
- Don't spend too much time on one question

Good luck!

Q1. Which hardwood has very few knots?		
Α	Mahogany	
В	Ash	
С	Beech	
Q2. What softwoods	is one factor that makes hardwoods more expensive than ?	
Α	Hardwoods need more care	
В	Hardwoods have higher density	
C	Hardwoods grow slower	
Q3. Which	hardwood is good for steam bending?	
Α	Ash	
В	Oak	
С	Beech	
Q4. What	manmade board has perpendicular layers?	
Α	Chipboard	
В	Plywood	
С	MDF	

Q5. Which softwood stains well?		
Α	Spruce	
В	Pine	
С	Larch	
Q6. Chipbo	pard can be toxic/had to recycle for what reason?	
Α	The adhesives in it	
В	Its recycled wood	
С	It has a very high density	
Q7. Plywood is used in many school workshops for what reason?		
Α	More durable than natural timber	
В	It's cheap	
С	Finishes well	
Q8. What is the main advantage of manufactured boards over natural timbers?		
Α	Much cheaper than natural timber	
В	Made in any shape/size/thickness	

Q9. MDF is going to be used to make a picture frame backing board. (a) Explain the environmental advantage of using MDF instead of pine to make a wall clock? (2 marks)	
(b) MDF comes in 61cm × 122cm sheets.	
Determine the number of 400mm x 400mm squares that can be cut from the given sheet. (4 marks)	

Q10. A CNC router was used to create the base of a chess board from a single bit of oak.
Explain three properties of oak that make it a good choice for the construction of the chess board (6 marks)
Q11. The handle of a kitchen knife has been made from the hardwood mahogany
Explain two benefits of using mahogany instead of pine for the kitchen knife handle? (4 marks)

What are two advantages, aside from cost, of using plywood instead of solid wood for the production of chess pieces? (4 marks)

Q12. Plywood is to be used to make a phone stand.

Answers

- **Q1**. A
- **Q2**. C
- **Q3**. A
- **Q4**. B
- **Q5**. A
- **Q6**. A
- **Q7**. B
- **Q8**. B

Q9a.

- Because MDF is created with waste materials (1), there is no need for the leftovers to be disposed of or dumped in a landfill (1).
- Using MDF will reduce the amount of natural timber being cut down (1), therefore pine as a natural resource will last longer/be put to better use (1).

Q9b.

```
400 mm = 40 cm (1)
61 = 1 whole cuts (1)
122 = 3 whole cuts (1)
1 × 3 = 3 whole cuts (1)
```

Q10.

- Strong (1) to withstand splitting (1)
- Tough (1) can absorb impacts (1)
- Hard (1) so won't wear away during use (1)
- Dense (1) allowing for high-definition machining (1)
- Stable (1) to prevent warping (1)
- Heavy (1) preventing movement when in use (1)
- Durable (1) so will be long-lasting (1)

Q11.

- Mahogany is less likely to splinter (1), as it is more dense than pine (1).
- Mahogany is more durable (1), meaning it is less likely to break when used (1).
- Mahogany is knot free (1), so there won't be any vulnerable weak areas (1).

Q12.

• Plywood resists warping (1) since it is a dimensionally stable material (1).

- Because plywood has uniform strength (1), tiny details are less prone to come loose (1).
- Plywood can be knot free (1), so there won't be any vulnerable weak areas (1).
